

CGX TRAINING

Dedicated to raising professionalism and standards in clinical trial management

Accredited Training Solutions for Clinical Trial Professionals

Companies that invest in training and development recognise the value of a skilled and motivated workforce. Training plays an essential role in building brand values and driving employee performance. And trained staff tend to repay their employer's investment with greater professionalism, higher quality work and reduced staff turnover.

CGX's tailored training solutions provide end-to-end learning and development programmes for organisations of all sizes and individuals embarking on a career in the Clinical Trial sector. We are involved in every aspect, from identifying skills gaps to delivering practical training courses and provision of internationally recognised qualifications. Our bespoke programmes are designed to improve marketing capability and build business advantage.

Serving Industry, Healthcare, Education, and the Individual

Corporate pharmaceutical/biotech businesses and contract clinical trial services - Bespoke, customised and off-the-shelf courses for clinical trial professionals, on- or off-site, one-off or life-cycle. Well trained staff are better able to successfully deliver quality clinical trials which meet regulatory standards and yield profitable outcomes.

Hospitals - Extensive training for Principal Investigators (PI's) and Health Care Professionals (HCP's) involved in conducting clinical trials. Highlighting the value of adopting stringent administrative and ethical processes, helps these professionals to deliver best practice.

Universities and Colleges - Training 'taster' courses as well as job-specific training for entry into the profession. Graduates with a science or mathematics degree background can learn about the career options from people with hands-on experience of the work.

Schools - Career talks, on-site, about clinical research and related career opportunities. Our role is to inspire the next generation of clinical trial professionals.

Individuals (career starters/career changers) - Training from scratch for clinical trial job roles including Clinical Trial Administrator (CTA), Clinical Research Associate (CRA) and Clinical Project Management (CPM). For professionals in pharmaceuticals and healthcare, training is an opportunity for career enhancement.

A Training Programme - Designed for You

Assessment – Gap analysis identifies key training needs and areas for development

Design – We draw up a training programme specific to address your needs

Options – Off-the-shelf courses, tailored content or a fully bespoke programme

Auditing in Clinical Trials

GCP (Good Clinical Practice) and Inspection Readiness

Risk-Based Monitoring

Soft Skills Training for the Clinical Trial Professional

About CGX

CGX Training is a **clinical trial specialist training provider** offering both traditional and e-learning courses to Clinical Trial Professionals (CTPs). We service corporate, healthcare companies and individual trainees seeking to embark on a career in this industry, and those requiring Continuous Professional Development (CPD). As a member of the CPD Certification Service, our accredited training, workshops and events qualify for CPD.

CGX delivers **clinical research education** to schools, colleges and further education colleges, to promote career opportunities in clinical trials as part of its commitment to promote STEM (Science, Technology, Engineering and Mathematics) education and broaden career options for young adults.

CGX also offers **consultancy services** to the clinical research industry to ensure the safety, quality and cost-efficiency of clinical trials. We deliver practical and interactive training courses using a variety of methodologies and tools.

Dr Lia Hunter is the founder and Managing Director of CGX Training and the driving force behind the raising of quality standards in training for clinical trial practitioners. She has over 25 years experience in the pharmaceutical/biopharmaceutical industry.
